

## Performing a Bandwidth Test using the App

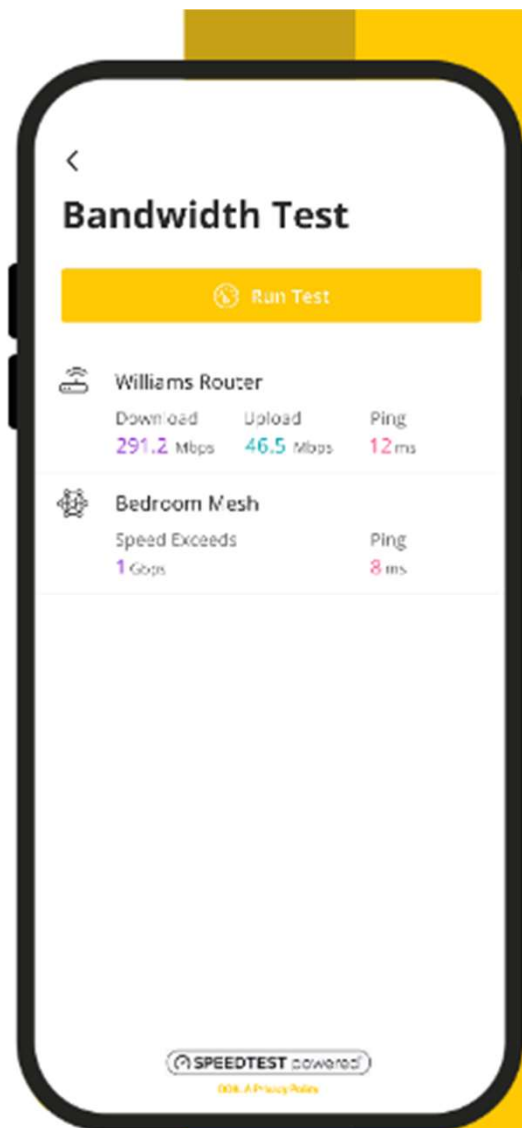

# Bandwidth Test

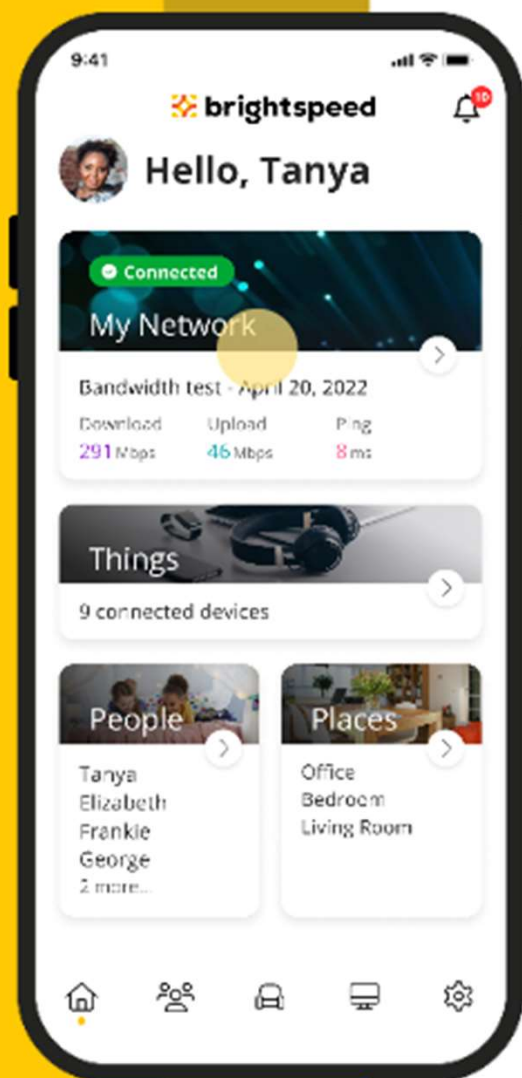

You can test your bandwidth speed and latency using Brightspeed WiFi

## Bandwidth Test

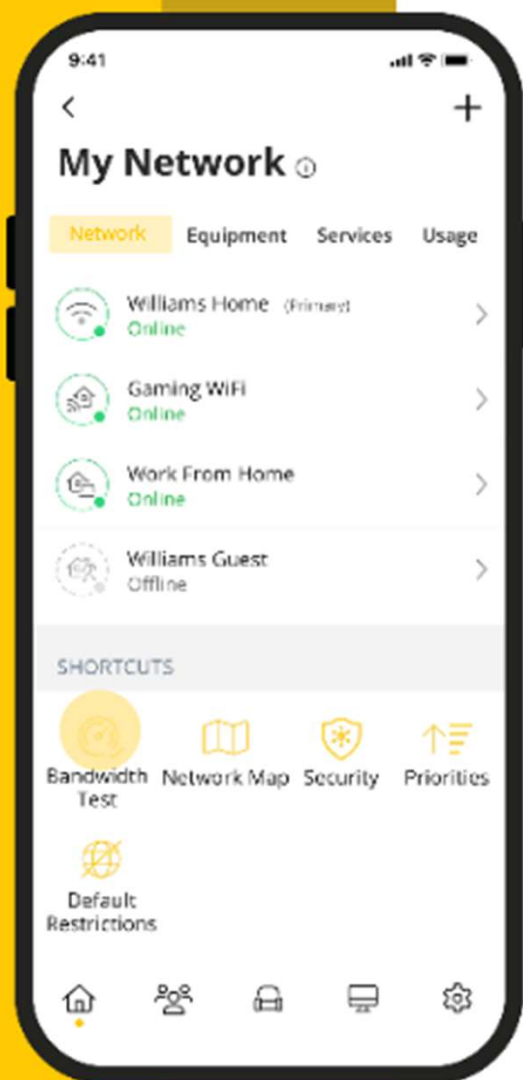

A bandwidth test helps you know that your network is operating as expected

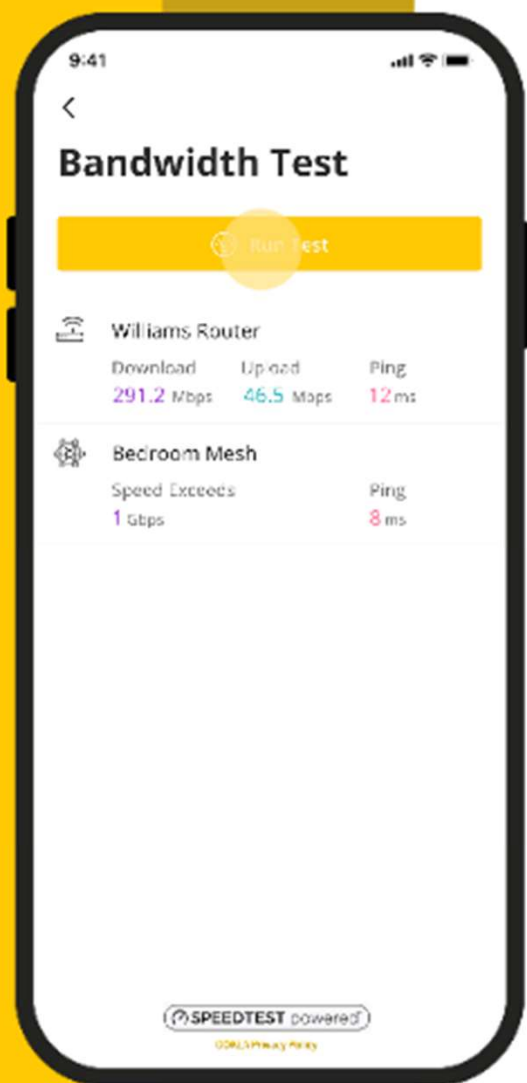

## Getting Started

Begin by tapping into My Network from the Dashboard

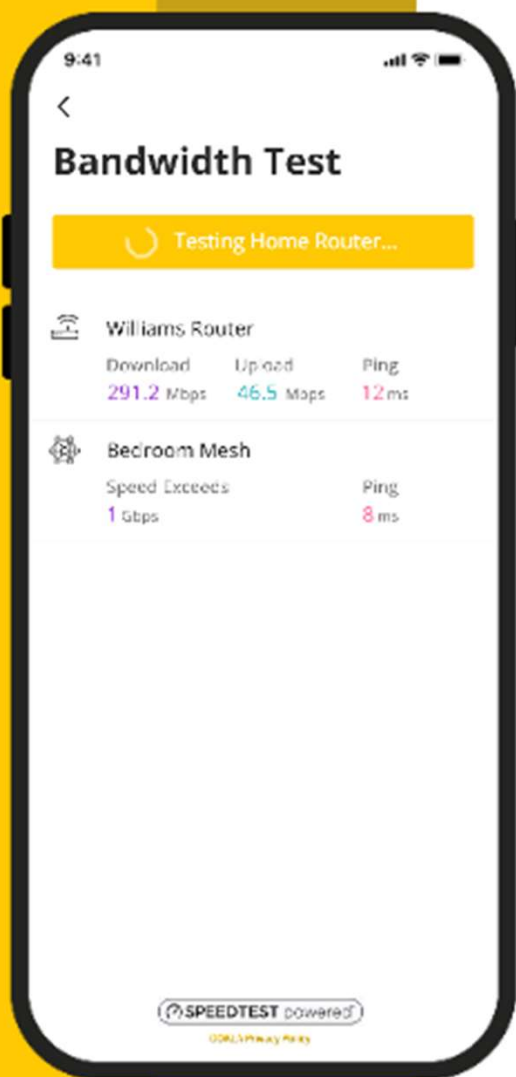

Getting Started

Tap Bandwidth Test

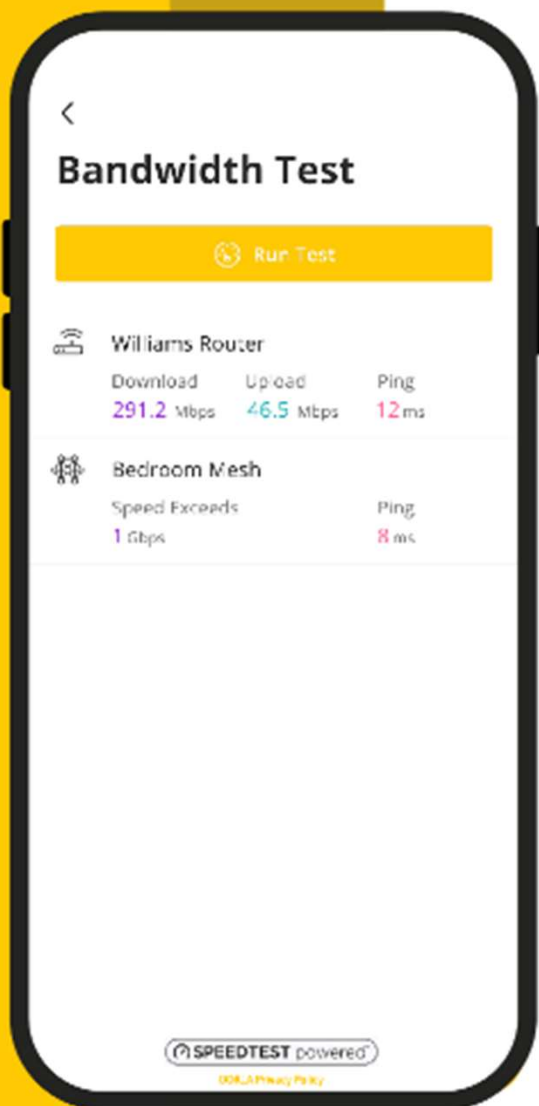

Getting Started  
Then tap Run Test

## Getting Started

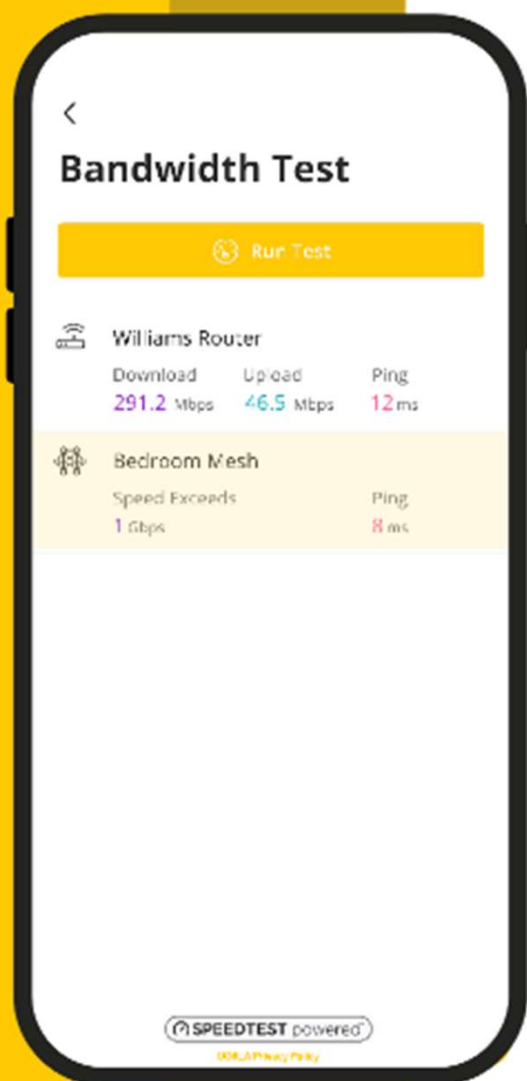

You'll see the results of your bandwidth test here and on the Dashboard

### How it Works:

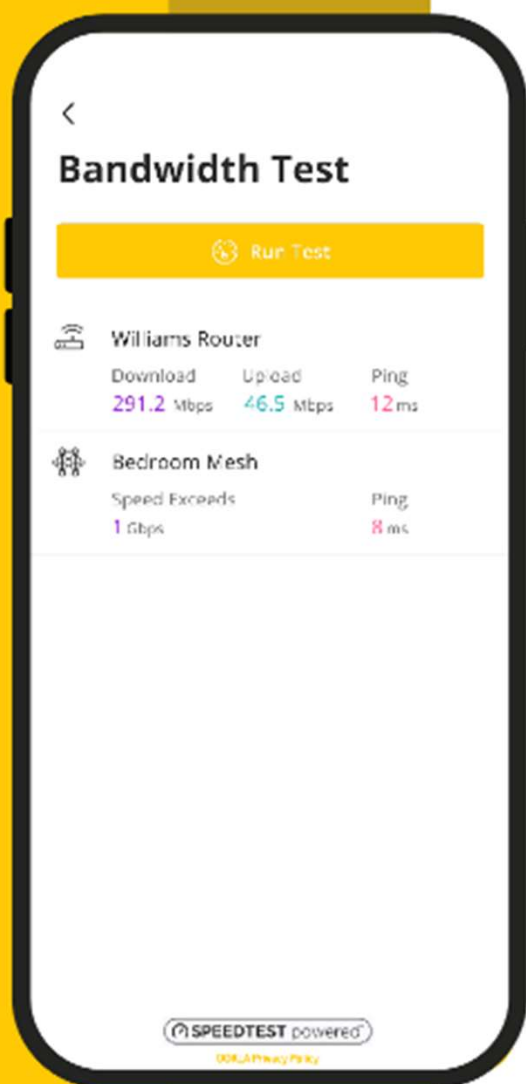

- This test will first run between your system and the Internet

### How it Works:

- If you have a mesh unit, it will then test between your mesh and the main system

### How it Works:

- You will receive an app notification when the test is finished
